PROFILE

Vibe Engineer with a strong background in front-end development and AI-assisted software engineering. Experienced in turning product ideas into production-ready applications using modern AI coding tools. Skilled at rapidly prototyping, debugging, and shipping scalable web applications while collaborating with teams to deliver high-quality software.

WORK EXPERIENCE

Freelance

JUNE 2026 - PRESENT

Vibe Engineer

- Build production-ready software using AI-assisted development workflows.
- Use Claude Code, Codex, and Google Stitch to rapidly prototype and implement new features.
- Collaborate with product and engineering teams to transform ideas into working applications.
- Optimize development speed while maintaining code quality and best practices.
- Debug, refactor, and improve existing applications for performance and maintainability.

NadBooks

2022 - 2025

Front-end Developer

- Developed responsive web applications using modern front-end technologies.
- Built reusable UI components and interactive user interfaces.
- Worked closely with designers to implement pixel-perfect designs.
- Optimized websites for speed, accessibility, and cross-browser compatibility.
- Maintained and enhanced existing products by fixing bugs and adding new features.
